

THE ALTERNATIVE SCHOOL FOR MATH & SCIENCE

ANNUAL REPORT
2021-2022

The Alternative School for Math & Science

Mission Statement

The Alternative School for Math & Science, a diverse community of students, teachers, and parents, provides an academically challenging and supportive learning environment uniquely designed for children ages 10-14. The School's innovative curriculum, atmosphere of trust and respect, and commitment to lifelong learning enable the positive development of the whole child.

Every aspect of school life is intended to help students learn tolerance, build integrity and character, and become responsible members of the broader community.

band practice, teachers and staff stood outside the doors to listen, and we all had tears in our eyes as our hearts burst with the joy of hearing the students play together again.

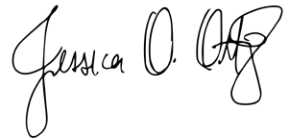

ASMS, as we knew it when our children attended, was back. The students went on class trips to the Y at Watson Woods and the Cornell facilities in Ithaca, performed in the Mary Poppins Jr. musical, and ate lunch together inside the lunchroom. Hearing their laughter, seeing their smiles, and watching their love of learning grow is why we do what we do.

The past year also brought change to our faculty. We announced a new academic head, and we sadly said goodbye to faculty members who have been valuable members of our learning community for many years. While the fond memories and the impact of their contributions will live on, we look forward to welcoming the new teachers and what they will bring to our school.

As we reflect on the impact of the pandemic, we are proud that our strong school mission and unwavering focus on curriculum enabled each student’s continued success. We are so grateful to all the members of the ASMS community who helped us maintain a safe, healthy, and dynamic program since the start of the pandemic.

With the same optimism and joy we had at the end of last year, we look forward to the coming year of overnight class trips, concerts, hands-on projects, and diverse activities that encompass an exceptional middle school experience!

Annual Fund Development Campaign

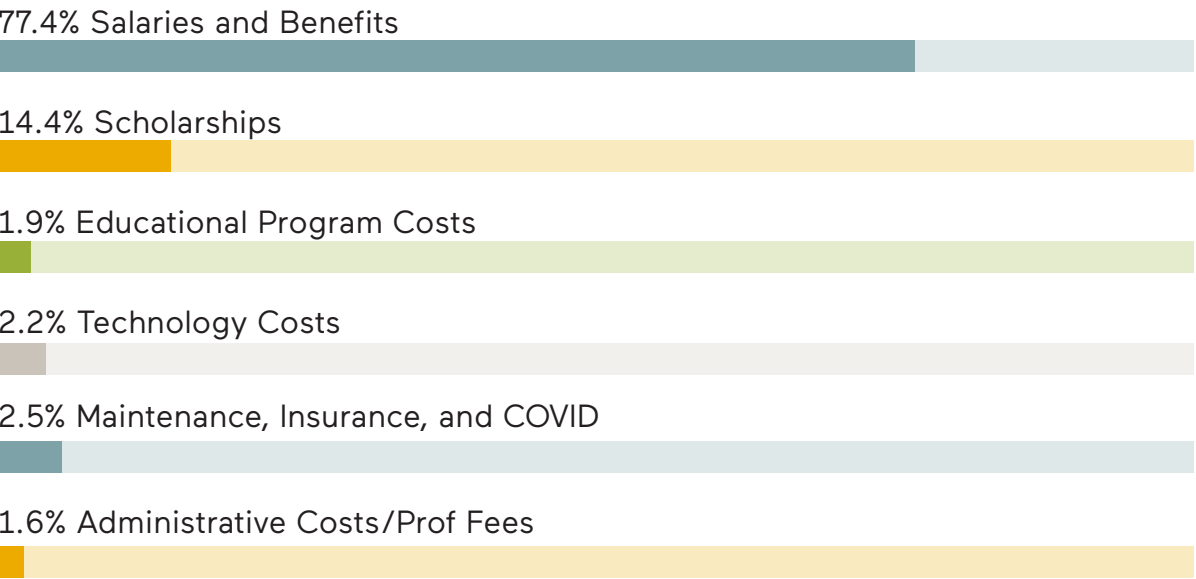

Cumulative Funds Raised 2003-2022
Includes matching gifts and corporate support
Does not include donated services or goods

Source of Funds 2021/2022
Total: \$2,513,207

Use of Funds 2021/2022
Total: \$2,477,668

Students

137 students in grades 6-8, with 3 sections of students at each grade level

Student body is 50% female and 50% male

ASMS served students from 12 local school districts, with 62% from the Corning-Painted Post School District

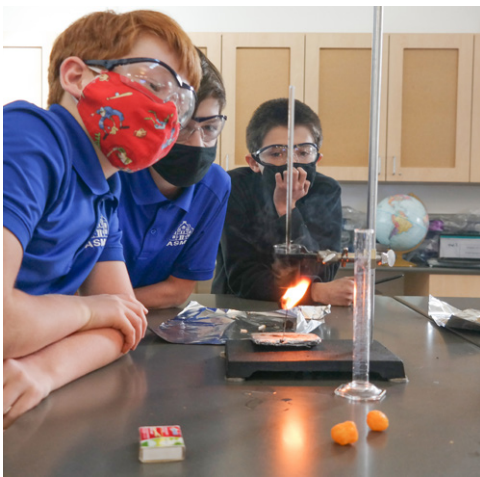

(Addison, Athens, Bath, Campbell-Savona, Elmira, Elmira Heights, Hammondsport, Horseheads, Lawrenceville, Northern Tioga, Odessa-Montour, Watkins Glen)

57% of students have a parent who works for Corning Incorporated

30% of students received need-based scholarships totaling \$356,885

Students provided 6,227 hours of volunteer service to community organizations and neighbors during the school year

Approximately 107,879 hours have been donated since the school opened in 2004

Student Participation in School-Sponsored Activities

We are proud of the exceptional levels of student participation in many school sponsored activities. All of the activities listed require a significant investment of time and effort on the part of our students to learn and improve their skills. Their commitment to personal excellence and to the success of a larger group is notable and should be celebrated!

ASMS AFTERSCHOOL SPORTS

81% of ASMS students participated in one or more after-school sports during 2021/2022 school year:

Badminton - Basketball - Volleyball - Wiffle Ball - Ultimate Frisbee - Rugby - Yoga - Running - Ice Skating - Strength/Conditioning - Handball

Alumni Spotlight

Ryan Bayne • Class of 2011

From ASMS, I went to Notre Dame High School in Elmira. Following graduation, I attended Cornell University, where I got a Bachelor of Science and Master of Engineering in Mechanical Engineering and was a member of – and eventually also fortunate to be the captain of – the Men’s Varsity Soccer Team. I’ve been in two different mechanical engineering roles since graduating: first, with Raytheon Missiles and Defense Systems, and now, with Manta Product Development.

Sam Bickham • Class of 2010

I attended Worcester Polytechnic Institute for mechanical engineering, where I got my Bachelor and Master of Science in 2018 and 2019, respectively. After four internships with Corning Incorporated, I was hired full time in 2019 with Corning’s Manufacturing Technology & Engineering in the Machine & Automation Systems group, where I have been working since then.

Rory McRae • Class of 2015

After my completion of ASMS, I attended the Forman School in Litchfield, Connecticut, where I got involved in the theater program, participating in seven shows and winning their performing arts award. I went to the American Musical and Dramatic Academy in New York City, where I graduated recently with a Bachelor of Fine Arts, completed in under three years.

Nia Walton • Class of 2012

I graduated from Spelman College in 2020 with a Bachelor of Science in Mathematics. While in school, I interned at NASA (some of my work is published on their website), and I led my own research projects with The Boeing Company and Georgia Tech in mathematics (applied and theoretical). I’ve had opportunities to present my research at Spelman College, Georgia Tech, and the Nebraska Conference for Undergraduate Women in Mathematics.

Lauren Witmer • Class of 2013

After graduating ASMS, I attended Corning-Painted Post High School and graduated in 2017. From there, I went on to St. John Fisher College to study accounting, and I graduated in 2020. During undergrad, I was a summer audit intern at The Bonadio Group in Rochester, New York. I started at The Bonadio Group full time in Fall 2020 after I completed my Certified Public Accountant certification. In May 2021, I transferred to Bonadio’s Dallas office.

Alumni Spotlight

Where are you located and what are you doing now?

Ryan: I’m currently in Boston working for Manta Product Development as a Mechanical Design Engineer. It is a design and engineering consultancy, meaning we have clients that hire us for projects ranging from conceptualization through to production. I’ve personally worked on four projects so far, spanning industrial robotics, dermatology laser systems, medical drug delivery systems, and skincare product packaging.

Sam: For the last almost two years, I have been working with Corning Display Technologies on melting system design. My projects have focused on rebuilding and upgrading melting systems across the plants worldwide, as well as the technical design of two delivery systems.

Rory: I’m currently located in Manhattan, New York, continuing to take classes in dance and voice, while regularly auditioning and completing callbacks for productions.

Nia: After school, I decided to serve in a cause I am very passionate about: educational equity. Thus, I now serve in Teach for America as an upper elementary school teacher at Democracy Prep Baton Rouge. I’ve been in the role now two years. After my first year, I took a position as a Professional Learning Cohort leader over the 3-5 Mathematics grade level. I’m also working toward getting a certification in Data Analytics with Springboard.

Lauren: I currently live in Dallas with my cat Aria and still work at Bonadio in the Commercial Audit Division, specializing in the audits of private-equity firms and for-profit medical companies. My clients are based both in the Dallas-Fort Worth metroplex and throughout the country, so I have had the opportunity to travel to numerous places.

What are your plans in the near future?

Ryan: The only concrete plan career-wise I have for the immediate future is pursuing a Master of Business Administration at Stanford University in the Fall of 2023. Outside of work, my family has an annual trip to the Adirondacks in August, which I’m looking forward to!

Sam: I plan on continuing my training in melt (thermal system) design, including getting hands-on experience during the startup of an upcoming system.

Rory: As of right now, I plan to continue taking classes and working on my craft and hopefully get involved in TV, film, commercials, and theatre.

Nia: My plans for the future include doing data-driven work to provide students with an equitable education.

Lauren: I plan on staying in Dallas and continuing public accounting. Outside of work, I plan on traveling to new

states and countries. Two years ago, I never would have imagined living in Dallas, so I’m keeping an open mind and seeing where life takes me.

What do you do for fun?

Ryan: Anything that involves being active and outdoors. I love soccer, running, cycling, hiking, photography, fly fishing ... the list goes on!

Sam: I enjoy spending time with friends and family, working out, and taking care of my 11-year-old dog, Polly.

Rory: For fun, I like to spend a lot of time outdoors, like Central Park. I like to explore the city, go to Broadway shows and music festivals, go for runs through the city, and create music.

Nia: In my free time, I enjoy doing hair, roller skating, watching anime, and spending time with my childhood dog, Jazz! I also like to travel to spend time with my family.

Lauren: I am a Dallas Stars season ticket holder, but don’t worry, I will forever be a Bills fan. I also love to travel both domestically and internationally and visit my friends living in New York and Boston on a regular basis.

Is there anything else you’d like us to know? Favorite memory from middle school?

Ryan: Two things I took for granted at ASMS were both the quality of teachers and the band requirement. Hopefully current students are able to enjoy and take full advantage of them while they can! Lastly, if any students, parents, or alumni of the ASMS community would like to talk more about interests in engineering careers or collegiate sports, feel free to reach out.

Sam: I can’t emphasize enough what a great learning opportunity the robotics program was for me. I continued it into high school, and it really taught me a ton about technical problem solving and thinking on my feet.

Rory: My favorite memories in middle school were in band and chorus class and creating music at the Prism Concert.

Nia: My favorite memories from middle school include getting close with my friends Stephanie and Hana, history lessons from Mr. Hamilton, and making bug habitats in science class. When I see kids picking on leaves and bugs with their bottoms stuck together, I think of Mrs. Killian!

Lauren: One of my favorite memories from middle school was doing the First Robotics competition in seventh grade. And while I could never be an engineer, I still enjoy playing with robots even today and love watching the show BattleBots on TV, which my dad and I went to the filming of in 2021.
